The Transportation Survey asked about Bike Paths and I don't think I commented on it. Bike paths on Hemlock and other streets suck. Why you ask? Because the cars drive on gravel road then drive down the paved road. The gravel falls out of the tires and ends up in the bike lane which is very unsafe for a rider. Sweeping the streets helps for a couple of hours but that is about it since there are so many cars and so many gravel roads.
Just my perspective as cautious bike rider, Lynn
