Hi Jeff,

I wanted to ask you about the North South Bike Ped route and the surface area that it requires. The TSP refers to using the "shoulder". How do you define "shoulder" as it relates to the proposed route? I have attached a photo of my front yard area. Would you place the hard surface right up to my fence and take the grass out?

When I met with you I said I didn't necessarily love this path going in front of my house but would support it because it's what's best for the community as a whole. However, if the shoulder is going to take my buffer of grass from the fence to the paved street i would be vehemently opposed. I have attached photos.

I know you are super busy but do you think you could answer this before the meeting tonight? I cannot attend as I run a cancer healing circle of 16 people on Tuesday nights.

Thank you so much!
