What is a TSP?

The Cannon Beach Transportation System Plan (TSP) is a plan to guide the City's future transportation system. The process will result in a plan for improving the transportation system for all users, including people who drive, walk, ride the bus, bicycle, use a wheelchair or cane, or deliver freight. The plan will lead to programs, policies, and new investments that respect the unique village character of Cannon Beach, while addressing ongoing transportation issues in the city. A key challenge for the TSP will be meeting local needs while also addressing the effects of visitor traffic.

The TSP will guide transportation investments for the next 20 years. It will include a prioritized list of needed transportation improvements for the city to begin implementing after the plan is adopted. The TSP will help to create an integrated transportation network for all the ways people get around, a system that will support the city's current residents, businesses, visitors, and future growth.

This project is partially funded by a grant from the Transportation and Growth Management (TGM) Program, a joint program of the Oregon Department of Transportation and the Oregon Department of Land Conservation and Development.

What will the TSP do?

- Create a plan for the future of transportation in Cannon Beach that reflects the unique challenges faced by the City, including local travel needs, heavy visitor traffic, parking, and connections for people walking, biking or riding the bus.
- Address current and future needs, including physical improvements to streets and sidewalks, changes to city policies, and new programs.
- Emphasize connections and safe conditions for all people traveling in Cannon Beach.

Ways to Get Involved

Please visit the project website to learn more about the project, share your thoughts on community needs, and review potential solutions as the project progresses.
